

BOIT Token

Whitepaper
2021 - 2022

Preface

As the cryptoverse expands and makes its entry into real world assets, there is also a need to increase the utilization of meaningful crypto and translate it into real world applications.

There is a need for existing fiat currency based service providers to accept and create an alternative revenue stream, integrating their existing business with an extension to crypto.

More and more existing Boit Club customers are opting for crypto payments rather than fiat payments. Being a global platform, this is a necessary extension to the existing business model, both from customer and vendor standpoint.

A fully equipped dex + utility tokens + real world assets will be the way all aggregation models move towards. BOIT's happy to be here first, with a unique and niche focus, giving us an edge over the rest that will follow.

History of Boit Club

BOIT CLUB

Founded in 2017

Aggregator for luxury Idle Assets hence the name – Business Of Idle Things.

Started with a network of Supercar owners across the globe
Conceptualised Supercar owner engagement via driving tours and travel experiences

Expanded to Yachts and Luxury real estate in 2019
Expanded to Private Jets during the Covid-19 Pandemic 2020

Mapped a global footprint by establishing a network of over 5000 assets spread across technologically enabled vendor base.

Expanded to the cryptoverse in 2021

Decentralised Finance

“

Boit Swap remains the best way to acquire \$BOIT tokens as the token will only be available on a Dex for the first year. CEX listing will be offered later on.

”

Introduction

Decentralized finance (commonly referred to as DeFi) is a blockchain-based form of finance that does not rely on central financial intermediaries such as brokerages, exchanges, or banks to offer traditional financial instruments, and instead utilizes smart contracts on blockchains.

Structure

DeFi platforms allow people to lend or borrow funds from others, speculate on price movements on a range of assets using derivatives, trade cryptocurrencies, insure against risks, and earn interest in savings-like accounts. DeFi uses a layered architecture and highly composable building blocks.

Potential

By October 2020, over \$11 billion (worth in cryptocurrency) was deposited in various decentralized finance protocols, which represented more than a tenfold growth during the course of 2020. As of January 2021, approximately \$20.5 billion was invested in DeFi.

Relevance

The power of **DeFi** now comes to the Real World Assets application through Boit Club and \$BOIT, wherein vendors are able to enjoy long term appreciative growth on services rendered at current prices. A magnanimous hedge to the depreciative nature of these assets. While the power of the blockchain helps bring transparency, organisation and reduces costs of middle men and create a value addition to the customers using the services.

BOIT's Defi protocol

Swap

The SWAP feature of Boit Swap will allow the user to connect a web-3 based Solana wallet to exchange \$BOIT for any other SPL tokens like WBTC, WETH and all other tokens available on the Solana network.

Pool

The POOL feature would allow the user to provide liquidity to a specific pair. This liquidity is used when ever a \$BOIT token is used, bought or sold on the dex. Providing liquidity will enable the user to Stake LP Tokens and FARM more \$BOIT at a phenomenal rate of return.

Stake

The power of DeFi now comes to the Real World Assets application through Boit Club and \$BOIT, wherein vendors are able to enjoy long term appreciative growth on services rendered at current prices. A magnanimous hedge to the depreciative nature of these assets.

Farm

The FARM feature on the Boit Dex will allow the user to provide liquidity in various trading pairs of \$Boit. This feature must only be used by the user if they understand the concept of impermanent loss.

Tokenomics

Max Supply

1,000,000,000

Capped Supply : Capped supply coupled with burns will make the token deflationary

Community Focus : Majority spread of the token is reserved for the community via rewards

Boit Foundation : 20% tokens will be reserved by the founding team to reinvest in the project.

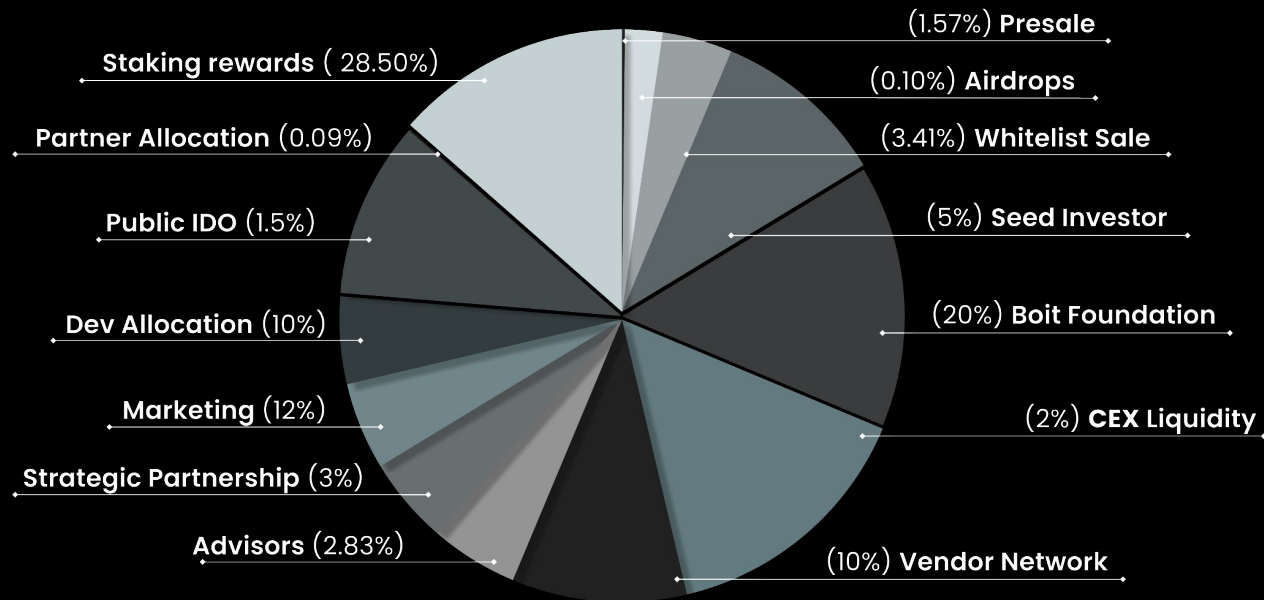

Team Token Lock Period : 15% Contract lock will disable access to the founding team token allocation for 2 years.

Dev Token Lock Period : Contract lock will disable access to Dev tokens for a period of 1 Year

Burn Rate : 0.005% on each transaction

Token Distribution

Token Allocation	Allocation	Tokens Supplied	Lock Period
Presale	1.57%	15,700,000	
Seed Investor	5.00%	50,000,000	
Whitelist Sale	3.41%	34,050,000	
Public IDO	1.50%	15,000,000	
CEX Liquidity	2.00%	20,000,000	
Staking Rewards	28.50%	285,000,000	
Boit Foundation	20.00%	200,000,000	2 Years Lock
Dev Allocation	10.00%	100,000,000	1 Year Lock
Marketing	12.00%	120,000,000	
Advisors	2.83%	28,330,000	
Strategic Partnership	3.00%	30,000,000	
Vendor Network	10.00%	100,000,000	
Airdrops	0.10%	1,020,000	
Partner Allocation	0.09%	900,000	

Distribution

The token distribution has been mapped keeping in mind an even distribution and a long term trajectory. The Staking rewards (28.5%) will be awarded to the Boit Club vendor and customer network for staking their tokens and truly leveraging the power of Defi in their regular scheme of business and consumption. The founders have kept a smaller share and vested the tokens in time locks for 2 years to ensure a majority of the tokens are used for growth of the project and the future events planned which would really bring the project to the forefront- Supercar Racing League®

IDO Tiers

The IDO tiers have been designed to keep a clear advantage across each round of investing. The allocations and application of funds will be used for the following rounds, after each round.

Presale - The Presale round will be focussed on close aides of Boit Club that will invest in the token before it has any liquidity. Funds will be used for development and launch of the project.

Whitelist Sale - The whitelist sale will be made available to holders of the Boit Club IDO Ticket NFT only. Fund will be used to provide liquidity for IDO and promoting the project.

Seed Investor - The first major investment into Boit Token. Funds will be used to provide liquidity for the CEX listing, combining the funds raised in the Public IDO round.

Public IDO - This will be the first time public can access Boit tokens. Funds will be used for CEX liquidity and listing of the token and providing liquidity for the tokens.

CEX Listing - Listing on a Centralised Exchange will make the Boit Token available globally. Funds will be used for launch and promotion of Supercar Racing League - a property that would solidify BOIT's presence permanently.

Presale			
Tokens	US\$ Value	Investment (USDC)	Slots
50000	0.0100	500	10
120000	0.0083	1000	10

HOW TO GET WHITELISTED

A unique NFT ticket

A limited amount of tokens will be sold to the early backers of the project. These will be available through a unique NFT ticket, a golden pass one must hold to gain access to the many facets of Boit Club, Boit token and the future endeavours of the project. This ticket will give the holder access to the Boit token IDO on the launch day.

- ▶ Get the BOIT TICKET to gain access to the Whitelist Sale
- ▶ Your ticket will decide the maximum allocation of BOIT tokens you are eligible to buy
- ▶ Mint the tokens using a Solana wallet using USDC or SOL
- ▶ Tokens will be tradable once liquidity is added to the trading pair, post this round
- ▶ HODL the NFT for long term benefits

BOIT NFT TICKETS

The only way to get access to the Boit token IDO is by owning the **BOIT Ticket**. The BOIT ticket comes with its own NFT benefits, and designed to remain a collectible and rare in its attributes. This unique launch will allow participants to mint a random ticket which will provide the holder access to the IDO as a whitelister,

Not only that, there are long term HODL benefits and we've priced it at a point where multiple tickets can be minted, and traded on a marketplace. The details for the NFT marketplace listing will be announced at the time of the launch.

Concept

The BOIT Club NFT Trump Card game is a one of a kind game that connects car enthusiasts and car owners in a metaverse experience.

Collection

A supercar that belongs to a member of the club, will be minted in two separate copies. 1/2 NFTs will be sold on the marketplace and 2/2 NFT will be airdropped to the owner

How to get in

Once the collection is released, the 1/2 collection will be auctioned on the Boit Club NFT marketplace. Once the collection is sold, the game room will be launched in a virtual party to let the trading begin.

How to Play

Only holders of the NFT will be allowed to enter the game room. The game will be held in rounds, with rotating turns for calls. When it's the player's turn, select your rarest attribute, if you are the rarest, all NFT's from that round get transferred to you, and the next round begins.
